The screenshot shows the React Developer Tools interface. The top bar has tabs for Elements, Console, Sources, Network, Timeline, Profiles, Application, and React. The React tab is active, showing a component tree. The selected component is a `<TodoItem>` with props: `key: "12", completed: false, id: 12, title: "Inspect All the Things!"`. The component's render output is visible in the right pane, showing a list item with a checkbox and the text "Inspect All the Things!".

Compatible avec votre appareil

**Adds React debugging tools to the Chrome Developer Tools.**

React Developer Tools is a Chrome DevTools extension for the open-source React JavaScript library. It allows you to inspect the React component hierarchies in the Chrome Developer Tools.

You will get a new tab called React in your Chrome DevTools. This shows you the root React components that were rendered on the page, as well as the subcomponents that they ended up rendering.

By selecting one of the components in the
